PHILOSOPHY

1 The Williamson County Board of Education seeks to create and to provide students with a learning
2 environment in which each student acquires skills and knowledge for life-long learning and
3 develops responsibility for disciplined self-direction. Education is available to all students
4 regardless of sex, race, color, national origin or disability.
5

6 We believe in each student's dignity, worth and unlimited potential for growth. We believe that
7 education is relevant to the student, community, society and world. Experiences provided in the
8 curriculum relate to and promote the richness and diversity of human experience and inspire each
9 student to improve the condition of mankind.
10

11 The learning experience is planned to facilitate the development of personality, physical health and
12 critical thinking to enable the student to face the future with confidence and to cope with changing
13 world conditions.
14

15 We believe that a comprehensive career development program is an integral component of public
16 education. To attain occupational competencies and related academic achievement is a shared
17 responsibility of home, school and community. Career education develops salable skills, good
18 work habits and ability to get along with others. Provision is made to utilize career experiences
19 provided by business and industry under a plan in which students are selected and supervised in
20 those experiences which are meaningful to the learner, useful to the employer and acceptable to
21 teachers and parents.
22

23 In the final analysis, we believe all learning is personal. The student acquires critical thinking skills,
24 respect for self and others, and capacity for self-direction and achievement as a contributing
25 member of society.
