Adopted Date:
7/19/10

4.607

Homework

1 Homework is defined as purposeful academic assignments given to students by teachers, which
2 are to be completed outside of class time.
3

4 Homework will be:
5

- 6 • **Rigorous:** homework will be challenging and appropriate to the developmental, emotional,
7 and academic levels of the students, will be structured for high completion rate, and will be
8 designed to be done independently without the assistance of the teacher or the parent.
9
- 10 • **Relevant:** students will realize the value of the homework in both their immediate and long-
11 range goals.
12
- 13 • **Related:** teachers will relate homework directly to identified learning goals.
14

15 All homework assigned will be reviewed and constructive feedback will be given to the student.
16 Beginning with third grade, when homework is given for a grade the percentage of the quarterly
17 grade attributed to homework will not exceed 20%.
18

19 Teachers will not assign homework to be completed over holidays, breaks during the school year,
20 summer, or with a “due” date that immediately follows these periods.
