COLLEGES AND UNIVERSITIES

1 The Williamson County Board of Education believes that the quality of the educational system is
2 as good as the quality of the teachers chosen for its schools. The educational programs of the
3 schools can be greatly improved by increased emphasis upon the selection and training of
4 teachers. This is a dual responsibility of the teacher training institutions and the public school
5 system.
6

7
8 Prior to the implementation of student teaching in the schools, an Agreement of Cooperation
9 between the Williamson County Board of Education and the college or university must be signed
10 by the Superintendent of Schools and official representative of the college or university.
