

A decorative border consisting of a grid of small, stylized human figures in yellow and blue, arranged in a rectangular frame around the text.

Medication and Clinic

Illnesses: Because germs spread so easily from child to child, we ask that you follow a few basic guidelines regarding attendance. A child should not be in school if he or she has a contagious illness (such as “pink eye”, strep throat, etc.), head lice or fever. Please do not send a student to school until he has been fever free for 24 hours.

MEDICATION: Any non-prescribed medication to be dispensed must be discussed with the school nurse. Students who need to take prescribed medication must have the appropriate form available in the clinic, signed by the physician and parent before the medication can be brought to school. The medication must be in the original bottle, brought in by the parent, and be left in the clinic.

CLINIC: The school has an equipped clinic managed by a full-time registered nurse and is prepared to deal with minor accidents such as scrapes and abrasions. In the event of a sickness or an accident needing further attention, the school will notify the parents or designated person immediately.

If you have questions, please contact our school nurse, [Mandi Thompson \(mandi.thompson@wcs.edu\)](mailto:mandi.thompson@wcs.edu).
