The Board establishes the following for schools and school sites:

	<u>Minimum Students</u>	<u>Maximum Students</u>
1. Elementary Schools	600	825
2. Middle Schools	600	1650
3. High Schools	1600	2200

Alternate grade configurations and school sizes may be recommended by the Superintendent and approved by the Board. The primary guiding principle in school design must be the educational program to be served.

The Superintendent and the staff are delegated the responsibility to approve building plans which best reflect the above considerations.

COST ESTIMATES

The Board recognizes that it is essential to establish a firm budget for each construction project. Budget setting is important as it assures the best and wisest expenditure of public funds to fulfill commitments made to the general public.
