**Add a Goggle Search box:**

Change in the code below (example, Centennial High):

- `value="askdavetaylor.com"` to `www.wcs.edu/chs`
- and change only search Ask Dave Taylor<br>
- to only search Ask Centennial High<br>

1. Open the page in Expression Web where you want your search box
2. Type the word here in the location for that box
3. Click the Split tab option in the bottom/left of the EW window
4. Double-click to highlight the word here in the design view and you will see it highlighted in the code view above
5. Copy the code below in the gray box
6. Highlight the word here in the code view in EW to select it
7. Control+V
8. Click down in the design view and you should see your search box

```html
<form method="get" action="http://www.google.com/search">

<div style="border:1px solid black;padding:4px;width:20em;">
<table border="0" cellpadding="0">
<tr><td>
<input type="text" name="q" size="25"
  maxlength="255" value="" />
<input type="submit" value="Google Search" /></td></tr>
<tr><td align="center" style="font-size:75%">
<input type="checkbox" name="sitesearch"
  value="askdavetaylor.com" checked />
 only search Ask Dave Taylor<br />
</td></tr>
</table>
</div>
</form>
```

Here's how that renders when included on an HTML page:

![Google Search](image)  
**only search Centennial High**
