| Standard 9.0                                                              | I can Evaluate commercial off-the-shelf products.  
| Demonstrate proficiency with the basic features and utilities available   | I can plan and set up a website using a GUI.  
| with commercial off-the-shelf (COTS) Web building software.               | I can add a folder and pages to a website using a GUI.  
|                                                                           | I can create head content and set page properties using a GUI.  
|                                                                           | I can create, import, and format text using a GUI.  
|                                                                           | I can add links to web pages using a GUI.  
|                                                                           | I can modify and test web pages using a GUI.  
|                                                                           | I can create unordered and ordered lists using a GUI.  
|                                                                           | I can create, apply, and edit Cascading Style Sheets using a GUI.  
|                                                                           | I can insert and align images using a GUI.  
|                                                                           | I can enhance an image and add alternate text using a GUI.  
|                                                                           | I can insert a background image using a GUI.  
|                                                                           | I can create external and internal links using a GUI.  
|                                                                           | I can create internal links to named anchors using a GUI.  
|                                                                           | I can create a Spry menu bar using a GUI.  
|                                                                           | I can create an image map using a GUI.  
|                                                                           | I can manage website links using a GUI.  
|                                                                           | I can incorporate Web 2.0 technology using a GUI.  
|                                                                           | I can create a page using CSS layouts and a GUI.  
|                                                                           | I can add content to CSS layout blocks in a GUI.  
|                                                                           | I can edit and format CSS layout blocks in a GUI.  
|                                                                           | I can create a table in a GUI.  
<p>|                                                                           | I can resize, split and merge cells in a GUI.  |</p>
