BEFORE arriving on campus

Below are screening questions all adults and students should answer prior to arriving on campus and will be repeated once they arrive to campus:

- Have you been in close contact with a person with a confirmed diagnosis of COVID-19?
- Have you had an unusual cough or shortness of breath?
- Have you had a sore throat or other flu-like symptoms?
- Have you had a fever of 100.0 degrees or greater in the past 72 hours?
- Have you had a loss of taste or smell?
- Have you had vomiting or diarrhea in the last 24 hours?

Any student who fails to meet these criteria should not report to campus and should contact their teacher, coach, or director to report their absence. Parents are encouraged to follow-up with a health care provider. Adults who fail to meet these criteria should not visit campus.

Parents and community members may donate masks, face coverings, water bottles, cleaning supplies, or touchless thermometers (see provided CDC guidance for acceptable thermometers) to their local schools.

ARRIVING on campus

- Students, coaches, parents, volunteers, and anyone coming onto campus should bring a mask or face covering.
- A Screening Checkpoint is required daily when arriving on campus if the intention is to enter the building or participate in a school activity. The screening questions from above will be asked during the screening.
- Temperature will be checked with a touchless thermometer for those staying on campus for activities or meetings.
- Anyone who fails to meet the screening question criteria or has a registered temperature of 100.0 degrees or greater will not be allowed to enter the building or participate in any activities or meetings on campus. Adults will be asked to leave campus while students will be isolated until a parent or guardian is contacted.

WHILE on campus

- Individuals will be asked to wear a mask when in the building.
- Hand washing stations will be provided with access to soap and water, hand sanitizer, etc. for before, during, and after activities.
- Spaces of 6 feet will be clearly marked anywhere a line may form.
- Students should bring their own water bottles with water fountains used only for refills.
- Students are encouraged to bring individual hand sanitizers for personal use if available.
- Students and adults will work in groups of 10 or less.
- Each group’s roster will stay as consistent as possible to help prevent the germ exchange between groups.
- Materials and equipment will be sanitized between uses.

VISITORS to campus

- Anyone coming to campus to drop off items and not requiring interaction with school staff may drop off items at a designated area at the building entrance or designated area without entering a screening area.
- Anyone coming into the school or office area to visit with staff should wear a mask or face covering, answer the screening questions, and have their temperature checked before entering the building.

AFTER leaving campus

- Facilities and equipment will be sanitized, disinfected, and secured for the next day’s use.
- Individuals should follow all precautionary measures and guidelines before returning to campus.

We will continue to update our plans based on guidance from the CDC and State and local health authorities.
